These references were cited in the International Search Report issued by the European Patent Office on the equivalent PCT application on April 17, 1998. It is drawn to the Examiner's attention that references AA and AI are two versions of the same reference: the US patent AA is the national phase entry equivalent of the WO publication AI. Applicants also do not have a more accurate date for reference AC. A copy of the International Search Report, which includes an indication of the relevance of these references, is enclosed.

Applicant respectfully requests that these references be entered into the record of this application. The Examiner is requested to initial the appropriate area on the enclosed copy of PTO Form 1449, thereby indicating consideration by the Examiner of each of these references.

Applicant respectfully submits that the present claims are patentable over the references identified herein, and requests timely and favourable examination of this application.

Respectfully submitted
